

**SONTSA**  
BEYOND CLEANLINESS

july 2024

### High quality

The SONTSA factory is a modern Belarusian enterprise, one of the largest production sites in Eastern Europe. All of production processes are fully automated. Wastefree production, own artesian well, six levels of water purification. Accredited laboratory and strict quality control service at all stages of production.

### Modern technologies

The only manufacturer of washing powder in Belarus using the «tower» method. The height of the spray tower is 56m. Thanks to this production technology, an ideal uniformity of active components in particles, high solubility and rinsing of the powder are achieved. High performance guaranteed.

### Reliable partnership

We guarantee timely and quality execution of orders thanks to well-organized business processes, cooperation with reliable suppliers, and a professional supply chain management team.

### Caring for the environment

The plant is located in the green zone. Constant monitoring of air, water, soil samples ensures the complete absence of emissions into the environment. The factory has aspiration systems that capture even the smallest particles and return them for recycling.
